

Hi, my name's Di and I have worked in the Allied Healthy Industry within the area of Obstructive Sleep Apnea since 2005.

I, myself, was diagnosed in 2003 and due to poor patient therapy options, I was delighted when the opportunity arose to work within the area and hopefully make a difference to people's lives. So, if you know someone who snores, or maybe even you, get a referral from your GP to come and see me. You wont regret the decision.

My likes include:- Travel, sun, sand, surf, and one of my greatest passions of Soccer. In 2010 at the World Cup in South Africa I was able to combine all of likes, and then some, at the one time.
